

Legal Tech App

Legal tech app aimed at granting easy access to lawyers to prisoners. Since it's a nigerian prison, for prisoners, it'll be low-tech ,maybe text a code for a start and it goes to our backend and we receive it on our dashboard.

To make it more sustainable for revenue, we will also make it a case management application for lawyers, court,judges,etc. But we'll take it step by step,first with lawyers.

Lean Web App MVP (With Case Management)

Core Features (Phase 1 MVP)

Case Intake & Registration

Prisoner/family/volunteer submits prisoner's details (name, location, charges if known).

Digital prisoner file created.

Lawyer Dashboard

See available prisoner cases.

Assign themselves to cases.

Update case status (Filed in court, Adjourned, Judgement delivered).

Case Management Module (Lightweight)

Timeline view for each case (arrest → hearing → appeal).

Upload key documents (charge sheet, bail application, ruling).

Notes/comments section for lawyer & volunteer.

Volunteer / Law Student Portal

Assist with data entry, follow-up calls, scheduling.

Gain supervised experience.

Notifications

Prisoner/family can check status via SMS shortcode/WhatsApp bot.

Lawyer gets reminders (next hearing dates, deadlines).

Dual-Track Case Management

1. Prisoner Legal Aid (NGO Track – Free / Sponsored)

Focus: Detainees without trial, pro bono representation.

Funding: Grants, donations, CSR, government partnerships.

Users: Volunteers, NGOs, human rights lawyers.

Case Flow: Arrest → Intake → Lawyer Assigned → Case Tracked → Resolution.

Value: Social impact + data for systemic reform.

2. Private Case Management (Paid Track – Revenue Generator)

Focus: Individuals & SMEs who want to track their own civil, commercial, family, or criminal cases digitally.

Features:

Timeline of hearings and deadlines.

Digital storage of court documents (rulings, motions, affidavits).

Automated reminders via SMS/WhatsApp.

Lawyer-client communication hub.

Optional video consultations.

Pricing Models:

Subscription: ~~₦2,000~~–~~₦5,000~~/month per individual client.

Pay-per-case: ~~₦10,000~~–~~₦20,000~~ one-time fee for digitized tracking.

Firm package: ₦50,000+/month for law firms managing 20+ clients.

Value to paying users:

- ✓ No missed court dates (reminders).
- ✓ Transparency — clients see progress instead of chasing lawyers.
- ✓ Secure recordkeeping of all case files.
- ✓ Access to vetted lawyers if needed.

⚙️ User Flows for Case Management

1. Client-First Upload (DIY mode)

SMEs, diaspora Nigerians, or individuals sign up directly.

They upload their case details, scanned documents, court summons, lawyer's info.

The system organizes it for them.

If they already have a lawyer, they can invite the lawyer to the platform (optional).

✓ Pro: Works even if lawyers resist joining.

✗ Con: Clients may not always have time or ability to upload documents correctly.

2. Lawyer-First Upload (Professional mode)

Law firms subscribe.

They use the platform to manage all their cases and clients, uploading documents, hearing dates, and updates.

Clients (SMEs, diaspora, prisoners via NGO) are given view-only or limited access to track progress.

✓ Pro: Reduces workload for clients, keeps lawyers in control.

✗ Con: Depends heavily on lawyers being willing to change habits.

3. Hybrid Mode (Best Fit for Nigeria 🇳🇮)

Clients can start the case profile themselves (basic info only).

The system then notifies their lawyer (if they have one) to take over and upload official documents.

If the client doesn't have a lawyer, the platform can connect them with one (this is where your NGO/legal aid feature comes in).

✓ Pro: Balances control — clients stay informed, lawyers handle the technical stuff.

✓ Pro: Strong fit for SMEs and diaspora (who just want updates), but still valuable for law firms.

🔑 Why This Works

SMEs: Would likely delegate upload to their company lawyer (but still want oversight).

Diaspora: Would sign up themselves and then either (a) upload docs or (b) connect their lawyer.

Lawyers: Get incentives to join because it doubles as a law practice management tool.

Prisoners/NGO: Your NGO team does the uploading on their behalf.
